What is the Weatherization Assistance Program?

Weatherization is designed to save energy dollars for low-income individuals and families (particularly the elderly and disabled). This program is multi-faceted in that it helps clients with energy education, practical experience, indoor air quality, combustion safety, increased energy efficiency, and the physical comforts of a fully weatherized home.

What do we do?

Our certified energy Auditors will conduct a visual home inspection, take the information and enter it into a computerized energy audit which determines what type of energy saving measures will be installed in the home.

Services may include: insulation, windows, doors, lighting, caulking, weather-stripping, furnace tune-up’s and repairs.
